

Founded in 2002 by Dr. Ashraf Sedhom, The Center for Oral and Reconstructive Surgery and Implantology in Aurora, Santa Fe Oral Surgery in Denver, and The Oral Surgery Center in Thornton were created with the vision to treat every patient with first class care. Committed to providing quality care and exceptional attention, our three board-certified surgeons have an accumulative experience of over 80 years. We pride ourselves on our expertise and education as our team has both dental and medical training. Specializing in all aspects of oral and maxillofacial surgery, in addition to dentoalveolar surgery, we focus on cyst and tumor management and reconstruction. As a team, we cover three area hospitals, taking pride in providing compassionate and comprehensive care. Dr. Sedhom offers annual symposiums for general practitioners, where we provide continuing education and the latest in the field of surgery. After finishing dental school, Dr. Sedhom went on to finish his residency in oral and maxillofacial surgery from California, his medical degree from Virginia, as well as fellowships in New Jersey and Philadelphia. Dr. Sedhom has numerous publications and is an international speaker. He pays special attention to the underserved in our community by offering no-charge surgery to those in need.
